Education

Memorial University of Newfoundland

Expected Graduation: Apr 2026

Bachelor of Science in Computer Science

St. John's, NL

- Courses: Algorithmic Techniques for AI, Software Development for Mobile Devices, Web Programming, AI in Computer Games, Software Engineering, Object-Oriented Programming, Data Structures and Algorithms, Computer Architecture

Technical Skills

Programming Languages: Python, JavaScript, Java, TypeScript, C, SQL

Libraries/Frameworks: React.js, Node.js, Express.js, Next.js, Spring Boot

Databases/Tools: PostgreSQL, MySQL, MongoDB, Neo4j, AWS, Postman, Git, Azure, Docker, Jira

Work Experience

Backend Developer

May 2025 – Present

Memorial University of Newfoundland

St. John's, NL

- Built Python ETL pipelines to migrate 200,000+ records from MySQL to Neo4j, ensuring 100% data integrity and powering graph-based backend services
- Engineered a Node.js backend integrated with Neo4j, enabling scalable management and querying of relationship data
- Optimized Neo4j-based data retrieval in Node.js, achieving approximately 60% faster multi-hop relationship lookups compared to MySQL

Full Stack Developer

May 2025 – Present

Memorial University of Newfoundland

St. John's, NL

- Spearheaded development and deployment of a React-based web application for the Psychology Department, improving accessibility and user experience for 200+ students and staff
- Facilitated weekly meetings with department staff to share progress, collect feedback, and align on feature updates
- Implemented a Node.js backend with MongoDB, enabling faster and more reliable data access
- Created an admin portal for faculty and department heads to manage content and monitor site activity, reducing reliance on developers for routine updates

Web Developer

Mar 2024 - Jun 2024

MSA at Memorial University

St. John's, NL

- Developed and maintained a web application for the student association using Next.js and TypeScript
- Incorporated PostgreSQL for efficient database management, showcasing robust data manipulation skills
- Built 15+ REST APIs in Next.js, resulting in optimized server-side functionality and seamless data handling

Projects

Project Management Platform | *Next.js, TypeScript, Node.js, MongoDB, Socket.IO, Gemini API*

GitHub

- Built a full-stack solution using Next.js, Node.js, and MongoDB, improving team coordination and task management
- Implemented real-time collaboration with Socket.IO and incorporated Gemini API for AI-driven task insights

Premier League Fantasy | *Java, Spring Boot, React.js, PostgreSQL, Python, Pandas*

GitHub

- Engineered comprehensive data scraping of match statistics for 600+ players using Python and Pandas
- Created a model to predict matches, integrating machine learning with scikit-learn
- Built a Spring Boot application with PostgreSQL and React.js to enable real-time data manipulation and dynamic presentation, streamlining user interaction and data flow

InternHub | *AWS, React.js, Node.js, Express.js, MongoDB, Gemini API*

GitHub

- Developed a full-stack internship portal with listings, applications, and reviews using React.js, Node.js, and MongoDB
- Integrated secure JWT authentication and AI-powered chatbot support with Google Gemini API.

Certifications

AWS Certified Cloud Practitioner | *AWS*

Aug 2024

The Complete Web Development Bootcamp | *Udemy*

Dec 2023
