Education

Memorial University of Newfoundland

Bachelor of Science in Computer Science

Apr 2026

St. John's, NL

Technical Skills

Programming Languages: Python, JavaScript, Java, TypeScript

Libraries/Frameworks: React.js, Node.js, Express.js, Next.js, Spring Boot

Databases: PostgreSQL, MySQL, MongoDB, Neo4j

Cloud & Tools: Git, Azure, Postman, AWS (Certified Cloud Practitioner)

Work Experience

Software Engineer

Jan 2025 – Present

Laniva AI

St. John's, NL

- Built and launched an AI SaaS platform using Next.js and PostgreSQL, automating property management operations across a portfolio of 350+ residential units
- Engineered an LLM-powered communication system using OpenAI API to handle tenant interactions across phone calls, SMS, and email, automating 70–80% of the workflow
- Deployed and scaled production infrastructure on Azure App Services and Azure Blob Storage, ensuring high availability
- Drove product iteration through direct customer feedback, improving reliability and real-world performance

Software Engineer

May 2025 – Apr 2026

Memorial University of Newfoundland, Department of History

St. John's, NL

- Designed and implemented Python ETL pipelines to migrate 200K+ records from MySQL to Neo4j, enabling efficient relationship queries while maintaining 100% data integrity
- Engineered a Node.js backend integrated with Neo4j to support scalable querying and management of relational data
- Optimized Neo4j graph queries for complex relationships, reducing latency by 60% over legacy relational database queries
- Applied semantic validation using RDF and SHACL to enforce data consistency, preventing invalid relationships in Neo4j

Full Stack Developer

May 2025 – Dec 2025

Memorial University of Newfoundland, Department of Psychology

St. John's, NL

- Led development and deployment of a React-based web application serving 200+ students and faculty, improving accessibility and usability of departmental resources
- Implemented a Node.js backend with MongoDB, designing RESTful APIs to enable scalable and reliable data access
- Architected an admin management portal enabling faculty to manage site content and monitor activity independently, reducing ongoing developer maintenance
- Integrated Azure Blob Storage for media asset management and deployed the application to Azure

Projects

Premier League Fantasy | Java, Spring Boot, React.js, PostgreSQL, Python, Pandas

GitHub

- Engineered comprehensive data scraping of match statistics for 600+ players using Python and Pandas
- Created a model to predict matches, integrating machine learning with scikit-learn
- Developed an object-oriented Spring Boot backend with PostgreSQL and React.js to enable real-time data manipulation and dynamic presentation, streamlining user interaction and data flow

Study Early | Flutter, Dart, Firebase, OpenAI API

GitHub

- Created a Flutter-based student productivity app for course management, scheduling, reminders, and progress tracking
- Integrated OpenAI for AI-generated quizzes and an in-app study assistant to improve learning

Project Management Platform | Next.js, TypeScript, Node.js, MongoDB, Socket.IO, Gemini API

GitHub

- Built a full-stack solution using Next.js, Node.js, and MongoDB, improving team coordination and task management
- Implemented real-time collaboration with Socket.IO and incorporated Gemini API for AI-driven task insights
